WORK EXPERIENCE

Technical Support Consultant – Rogers Communications **Mar 2022 – May 2023**

- Provided technical support and troubleshooting for internet services, including connectivity issues
- Assisted customers with configuring and optimizing their home network with routers and modems
- Developed and maintained knowledge base articles and documentation, which improved the efficiency of the support team and reduced resolution times
- Improved communication and soft skills by managing challenging interactions and delivering clear, empathetic support

Multi-Department Specialist – Food Basics **Jul 2017 – Aug 2021**

- Assisted customers with inquiries, product info ensuring a positive shopping experience
- Monitored and restocked inventory levels, managed product placement, and ensured the availability of merchandise
- Improved efficiency in task execution and time management, leading to faster service and better store organization
- Enhanced teamwork and collaboration skills by working closely with colleagues across departments to achieve common goals and support store operations

PROJECTS

Interactive AR App for York University

- Led a team of 3 developers and designers using Agile Project Management to create an AR platform that enriched the campus experience for students and alumni.
- Integrated Mapbox API and Google Maps API to create a dynamic map feature within the Unity-based AR application, highlighting key locations and points of interest on the university campus

Full Stack E-Commerce Website

- Built the UI with React and Tailwind CSS, focusing on a responsive and modern design, and developed backend services with Node.js

CERTIFICATIONS

Responsive Web Design – freeCodeCamp
