WORK EXPERIENCE

Technical Support Consultant – Rogers Communications

Mar 2022 – May 2023

- Provided technical support and troubleshooting for internet services, including connectivity issues.
- Assisted customers with configuring and optimizing their home network with routers and modems.
- Developed and maintained knowledge base articles and documentation, which improved the efficiency of the support team and reduced resolution times.
- Improved communication and soft skills by managing challenging interactions and delivering clear, empathetic support.

Multi-Department Specialist – Food Basics

Jul 2017 – Aug 2021

- Assisted customers with product knowledge, ensuring a positive shopping experience
- Efficiently monitored and managed inventory levels, reducing stockouts by 17% average and ensuring merchandise availability during peak hours.
- Trained new hires on store protocols and inventory management, improving team efficiency and fostering a collaborative working environment.

PROJECTS

Interactive AR App for York University

- Led a team of 4 developers and designers using Agile Project Management to create an AR platform that enriched the campus experience for students and alumni.
- Integrated Mapbox API and Google Maps API to create a dynamic map feature within the Unity-based AR application, highlighting key locations and points of interest on the university campus

Personal E-Commerce Brand Development | Full Stack E-Commerce Website

- Designed and built a full-stack, scalable e-commerce platform from the ground up using Next.js, ReactJS, Tailwind CSS, and MongoDB, with a focus on performance, security, and SEO optimization.
- Developed and integrated key features such as user authentication, payment gateways, and product management, improving backend efficiency.
- Led UX/UI design efforts to create an intuitive and visually appealing user interface, enhancing overall site usability
